ENGINEERING PROJECT DESIGN TEAM

Kramer Consulting, LLC has provided quality engineering services required to successfully complete improvement projects since the firms' establishment in 1959. Our staff is experienced in providing complete engineering services for analysis and design of water, wastewater, gas, street, park and other projects. We will commit the resources needed to keep the project on schedule. It is our priority to protect the public's health, safety and welfare.

Our staff has gained technical knowledge through schooling, specialized studies, training seminars, and on the job experiences.

Management and Staff – Team Members Assigned to this Project

- | | |
|-----------------------------------|--|
| John P. "Jack" Kramer, P.E., P.S. | - Senior Project Engineer, provide consulting and review of major aspects of design. |
| John B. "Ben" Kramer, P.S. | - Project Manager, supervise and coordinate engineering design, analysis and recommendations. Supervise and prepare design work on project, prepare specifications, cost analyses and monitor construction activity. |
| Joshua B. Kramer, P.E. | - Professional Engineer, preliminary information, project plans and specifications, deliverables, cost estimates, and other appurtenant items to complete the Project. |
| Mike A. Dalrymple, P.E. | - Professional Engineer, preliminary information, project plans and specifications, deliverables, cost estimates, and other appurtenant items to complete the Project. |
| Daniel D. Shively, R.P.R. | - Resident Project Representative, coordinate construction phase activities, on-site during construction to observe that contractor is following engineer and agency approved plans and specifications. |
| Kyle R. Kelly, Engineering Tech. | - Engineering Technician, will aid in drafting Project needs with CAD, gather crucial field data for projects, and help with gathering survey data, easements, right of way, or other various project needs. |
